*SIRIUS VERSION 3.0:* We are very happy to announce the NEW and very EXCITING Sirius version 3.0!

*Introducing Sirius New and Flexible Main Screen!*

### NEW FEATURES:

- 1. Nicely Organized Charts in Upper Right Corner of Main Screen!**  
Chart entries in the upper right corner are displayed in an organized format. Instead of appearing in the order that the charts were selected, by default they are now arranged alphabetically with all charts for a person grouped together and indented under the natal chart.
- 2. Automatic Backup of Chart Sessions and Easy Restore:** When you clear the current charts and create a new group of charts, the charts in the previous session are saved with the current date and time. With this new feature you can restore all of the chart selections, like the progressed, return, composite charts and reports you selected even if you accidentally cleared all of them and would like to restore them in the future.
- 3. Access to the Database of Charts Directly from the Main Screen:** Access charts from the database and add them to your current list of charts from the lower right corner of the screen.
- 4. Flexible Search:** In Sirius 3.0 the "Get Group of Charts" button has been renamed to "Flexible Search". You can also access the Flexible Search window directly from the main window. In the lower right corner of the main window where you can read in charts from the database there is also a "Flexible Search" button that takes you directly into the Flexible Search window.
- 5. Improved Calculated Charts Box:** You can now see the list of additional calculations you selected for a specific chart such as Solar Return, Lunar Return, etc. by clicking on the + or - next to the name in the Calculated Charts box.

#### 6. Run 2 Sirius Programs Simultaneously on One Computer:

Some people like to run the research feature of Sirius on, for example, all data with A or AA accuracy, while still being able to use the program. Each search could take many minutes to run. Now you can install Sirius in 2 different folders on the same computer.

**7. Eclipse Charts for Location of Maximum Eclipse:** In Sirius 3.0 you can have Solar and Lunar Eclipse charts calculated for the place where the eclipse at its maximum is most visible by checking a "Use Place of Max. Eclipse" box.

#### 8. Saros cycle of Eclipse Charts Indicated in the Chart Wheel:

When you produce a Solar Eclipse chart wheel, the Saros Cycle and what number the eclipse is in that Saros Cycle is given in the name of the eclipse on the chart wheel. Also, when selecting Eclipse charts you can select a sequence of eclipses in the Saros cycle and with this new feature for the Saros Cycle and number of the eclipse within that Saros Cycle displayed, you have the confirmation of which eclipse is the first one in a Saros Cycle and that you are viewing each consecutive eclipse in that Saros cycle when you select a series of Saros Cycle eclipses.

#### 10. Fractal Time Progressed Houses:

Fractal Time Progressed Houses and the Fractal Primary Progressed chart introduce a simple, clear and elegant way to solve a riddle that astrologers have been wrestling with for over a thousand years: how to properly calculate primary directions, while also providing a way to calculate secondary progressed houses in a logical way. This is now included in Sirius v3.

#### 11. The Fractal Primary Progressed Chart:

As explained in the section above on Fractal Time progressed houses, the formula for calculating a Fractal Primary chart is the application of the formula a day equals a year twice, which results in a time of slightly less than 4 minutes equal to a year of life. A beautiful result of this method of calculating progressed houses using the Fractal Time method and calculating primary directions using the Fractal method is that the secondary progressed houses and the primary progressed houses are identical as they are perfectly synchronized in this fractal manner.

**12. Aspect Lines to Asteroids in Chart Wheels:** Simply check the box and aspect lines are drawn to all of the asteroids in the chart wheel. Note that we use the term "asteroids" here to include minor planets, etc.

#### 13. Beautiful Gradient Zodiac Signs Areas Around the Chart

**Wheel:** Wheel styles that have zodiac signs around the outer edge are very popular. In Sirius 3.0 these colored zodiac areas can have colors that blend into each other in a rainbow effect, which is known as a gradient by graphic artists.

#### 14. Beautiful Gradient House Number Areas in the Chart

**Wheel:** In wheel styles that have the numbers of the houses 1 to 12, the colors of these areas can also be a color gradient where the colors gradually change just as can be done with the zodiac sign areas as described in the previous section.

#### 15. Direct Midpoint Structures and Harmonics 1-128:

Now this listing includes the widest orb of the 3 orbs formed by the 3 planets in that harmonic so you know how far the 3 planets spread in the harmonic.

**16. Minor Improvement to Reading Places:** When entering the place of birth in the data entry screen the places that match what you type are shown so you are able to quickly read in the place.

#### 17. Time Line Format Transits for 2, 3, or 7 Days:

In Sirius 2.0 and earlier versions of Sirius and Kepler you can produce a Time Line Format Transits forecast, for 1 day, 1 month or up to 12 months. In Sirius 3.0 it is also possible to select 2 days, 3 days, or 7 days for transits.

*Included in  
Sirius v3*

#### 18. Customized Shading of House Positions in

**AstroMaps:** Some people want to see in an AstroMap all areas where, for example, the Sun is in the 10th house or where Venus is in the 7th house. In Sirius 3.0 you can select a planet, a house, and a color so you can see shaded areas for the planets in houses that you are interested in.

#### 19. Mixed Midpoint Structures and Golden Mean Midpoint

**Structures in Synastry Midpoint Trees:** You can now produce Mixed Midpoint Synastry Midpoint Trees in Sirius. An example of a Mixed Midpoint between the charts of Jack and Jill is Jack's Sun conjunct the midpoint of Jack's Venus and Jill's Mars. Instead of a midpoint structure formed by a planet in Jack's chart to a midpoint in Jill's chart of vice versa, the midpoint is made from one planet in one chart and another planet in the other

chart. The planets are color coded in the midpoint tree to make it clear which planet is from which chart. Also, in Sirius you can include golden mean midpoint structures between two people.

20. **The latitude and longitude of the place** is shown when entering a place in the data entry screen. This is helpful when there is more than one place with the same name and you are confirming the location with the latitude and longitude instead of, or in addition to, the province or county of the location.

21. Ability to search for part of the first name or part of the person's name. This is helpful when you cannot remember the last name of the person or how you may have entered the name.

22. **Ability to select multiple pairs of planets for planet returns.** A planet return is similar to a solar return or a lunar return except other planets are involved in the return. You can, for example, have a return chart for transiting Venus conjunct Sun or transiting Mars square Mercury or simply a Mercury return (Mercury conjunct Mercury).

23. **The Birthday Reminder feature can now produce a list of email addresses.** The Birthday Reminder feature produces a list of the names of people who have a birthday on a particular calendar date or within a range of calendar dates. In Sirius 3 you also have the option of producing a list of the email addresses of these people if you have entered the email address either in the Notes field or in Business Manager.

24. **In the Time Line format forecast you can now select up to 8 transiting arabic parts and 8 natal arabic parts.** An Arabic Part has the formula  $A+B-C$  where A, B, and C are one of the 10 planets (Sun, Moo, Mer, Ven, Mar, Jup, Sat, Uran, Nep, or Plu). For natal arabic parts, planet A can also be the Asc or MC. "Time Line Add Arabic Parts.htm"

25. **In transit-to-natal and transit-to-transit text listings, the latitude and/or declination of the transiting and natal planet can be listed, and you can list only aspects that occur when both planets have the same latitude within a given orb.** This feature allows you to obtain listings of "near occultations" and occultations that occur between planets. With this new feature

### New Main Window Technique Toolbar

you can, for example, produce a listing of either conjunctions that occur in the sky (transit-to-transit) or aspects that occur between transiting and natal planets that are these rare alignments of planets within an orb that you select. You can also include other aspects in addition to the conjunction.

26. **Easily select harmonic charts that are important constant values in physics and mathematics like pi and phi (the golden ratio).** In the window for selecting harmonic charts, there is now a "Constants (pi, e, phi), et." button that you can click to obtain a list of 26 constants and you can check any that are desired. The 3 most well-known of these constants are pi, phi, and e and there are 23 other less commonly used constants that can also be selected.

27. **Improved display of chart wheel:** The chart wheel on the screen, by default, is centered horizontally and vertically in the available area for the chart wheel.

28. **In a financial forecast of stock prices or commodity prices such as gold prices, for example, you can now choose whether you wish to see a graph of only days on which there are prices or to also include days such as weekends and holidays when there are no stock prices.** This is purely an aesthetic preference and has no effect on the calculation of the correlation between actual and predicted stock prices.

29. **Automatic calculation of Consecutive AstroSignature Forecasts with Correlations to Seasonal Data:** Quickly produce monthly forecasts of batting performance for the 5 months of the baseball season, skip 7 months when baseball is not played, and jump automatically to the next season.

30. **Improved importing of baseball batting performance.**

Graphic Display of Planet Declination & Latitude

Sirius comes with a program called GetBat.exe, which imports batting performance from files that are located at website [www.retrosheet.org](http://www.retrosheet.org). The instructions on the screen should be self-explanatory.

**31. Gauquelin husband-wife data.** In the ResearchFiles folder within the folder where Sirius 3 is installed is the file GauquelinFatherMotherData.csv. This file can be imported into Sirius by selecting “BirthFile” in the menu bar at the top of the main Sirius window and then selecting “Import Birth Data” from the pull down menu and then selecting “Gauquelin Heredity Data” from the next pull down menu. You are then prompted for the Pair Category that you want to import the data into. The new “Pairs Exploratory Research of Synastry Angles” feature is a powerful new way to research synastry angles between the husband-wife pairs.

**32. Pairs Exploratory Research of Synastry Angles:** This new feature provides the ability to see a graph and details of the angular distances between two planets in pairs of charts. Aspects between charts are sometimes referred to as synastry angles so another way to describe this feature is that it allows you to see

	24	25	26	27	28	1	2	
	Dhanashta	Satabhaha	PBhadra	U Bhadra	Revati	Aswini	Bharani	a
23	ra	g	s	d	ch	l	u	3 Kritika
22	kh	bi	AD	pi	AR	ku	a	4 Rohini
21	j	CP	ah	Rika	o	TA	v	5 Mingashira

19	y	SC	Thu	Mon, Wed	au	CH	h	7 Punarvasu
18	n	e	LI	VI	LE	ku	d	8 Pushya
17								

*Sarvatobhadra*

a graph of synastry angles. This is a flexible and powerful new feature that allows you to view the results in various ways and to automatically produce results and save them to file for dozens of planetary pairs.

**33. Improvements to AstroSignature Research:** Include the Mean South Node and True South Node of the Moon in AstroSignature research. In previous versions you could select the Mean and True North Node but not the South Node.

**34. House numbers in a chart wheel can now be given in reverse order:** Some astrologers prefer to call the 12th house

the 1st house, the 11th house the 2nd house, etc. Although this may sound peculiar at first, planets move through the houses in their diurnal motion backwards through the houses, so reversing the order of the planets results in planets moving through the houses in normal order rather than reverse order through the day.

**35. Both True and Mean Lilith in Chart Wheel:** Put both True Lilith or the Mean Lilith in the chart wheel but in the wheel.

**36. Aspect lines can now be drawn to additional asteroids that are in the chart wheel.** Put Sedna, Eris, and other asteroids in a chart wheel and have aspect lines drawn to these additional asteroids.

**37. Easier way to find a chart entry:** If you have 20 or 30 or more current chart entries (charts that you are currently working with), you can now enter any part of the chart entry name to see a list of all chart entries that have this text and click on the desired entry.

**38. Include the day of the week in the date that is shown in the chart wheel.** To select this feature, right-click on the chart wheel, select the “Customize” button and then the “Page Designer” button and then right-click on the date in the Page Designer wheel and check the box in the lower left corner to include the date.

**39. Additional Utility Features:** Ability to print a graphic image, remove duplicate lines in a text file, and to compare two text files and remove duplicate lines in one of the files.

40. **Save Forecast Text Listings in CSV format** for reading into spreadsheet programs and research programs.

41. **TriWheels and QuadWheels** can now have up to 3 aspect grids instead of 2 aspect grids.

42. **Electional Astrology Graph for Planet Based on Rulership/Exaltation/Detriment/Fall:** This feature allows you to scan long periods of time to determine when a planet has good dignity. These new Electional Astrology Graphs provide classical astrologers with a set of tools to pick the best days during a time period and then pinpoint the time of day for these days.

43. **New Profile Scores Report:** Gives scores for the 4 elements (fire earth air water) and 3 modes (cardinal fixed mutable)

44. **Improved Planet-in-House colors in Treasure Maps:** In Sirius 2.0 you can show where, for example, Venus is in the 5th house of 7th house in the Love and Romance Treasure Map. In Sirius 3 we have improved how this looks by blending the yellow-red color areas a little more delicately.

45. **Ability to Select Planets in Houses in Treasure Maps:** Create green-colored areas in the AstroMap for any planet in any house, the ruler of a house cusp or planet in another house, and the zodiac sign of any cusp. This creates the opportunity for you to customize the Treasure Map so that you can see what areas of the world have a planet in a house or the dispositor of a planet or house cusp in a house, or particular rising signs.

46. **Declination and Latitude Graphic Display.** This simple graphic display enables you to obtain a visualization of which planets are out of bounds, near the ecliptic planet, etc.

47. **Glenn Perry's Developmental Age Method forecast:** The Developmental Age Method is developed by Dr. Glenn Perry, a leading psychological astrologer. The Developmental Age Method shows the dates when each house unfolds and develops in the psychological development of the person.

48. **Venus Star Points by Arielle Guttman:** The Venus Star Points are critical points in your astrology chart that are critically important for understanding how Venus functions in your astrology chart. Arielle Guttman's ground-breaking book "*Venus Star Rising: A New Cosmology for the 21st Century*" describes what the Venus Star Points are and how to interpret them. Now you do not need to scroll through tables of data to find your Venus Star Points. You can simply select them in the

Sirius 3.0 software.

49. **Aspects of Eclipse Points to Your Natal Chart Throughout Your Life:** Astrologers often like to know what aspects the eclipse points make to planets in the natal chart. Now you can obtain a listing of these aspects from birth up to 100 years of age. This listing of all aspects of solar and lunar eclipses, the point of the eclipse (the zodiac degree and minutes of the Sun and Moon at the time of the eclipse) and the date, and the aspects to planets in your natal chart is a very handy and helpful way to know what planets are getting triggered in your chart by eclipses.

50. **New Arabic Parts Listings features:** In Sirius 3.0 it is now possible to obtain aspects of Arabic Parts to natal planets, there are more Arabic Parts to choose from, there is a new format option, and there is a new default listing of Arabic Parts from well-known Turkish astrologer *Oner Doser!* These 4 new features of the Arabic Parts listing make the Arabic Parts listing more useful and helpful to some astrologers. You can choose from among 9 aspects (5 Ptolemaic and 4 others) and the desired orbs. You can also place the name of the arabic part before the formula which is a nicer format for some astrologers, and more Arabic Parts have been added to the list of Arabic Parts. There are now more than 400 Arabic Parts to choose from. A new default list of Arabic Parts called "Short List by Oner Doser" can also be selected. This list is based on the latest research of Oner into arabic parts used by various astrologers primarily during the medieval and Renaissance periods. He is also collecting other lists of arabic parts which will be added in the future as additional lists that can be produced.

51. **New Profections features:** Create Monthly Profections, Daily Profections, and a 1 Year = 1 House method that is different from the 1 Year = 30 Degrees method.

52. **Chiron and Asteroids Report by David Campbell:** Click on Chiron, Palas, Juno, Vista, or Ceres and get an automatic interpretation on the screen.

53. **Matrix Search, Matrix Horizons, and Day Watch Now Included:** Note: these added 3 programs only work on the full version of Windows if you are working on a Mac computer.

*MORE NEW & EXCITING FEATURES: In Kepler Workshop!*

54. **Muhurta: new added item:** "Performing Religious Rites"

**55. Asteroid Ephemeris: Revised and Improved:** Option to split a table to several ones in case more than N (defined by user) item selected added. This resolves a problem when many objects don't fit on the document width. Also settings interface has been improved. In particular, number of selected asteroids displayed, after adding/deleting a next item selected to make group operations easier.

**56. Composite charts support:** Kepler Workshop can now work with the composite charts that are created in main part of the Sirius program.

**57. Chakra table also includes a 28 nakshatra table:** In addition to the common 27 division, a rarely used 28 nakshatra division has been added to the Chakra Summary table. (Abhijit)

**58. Diamond Chakra Wheel Style** has been added

**59. SarvatoBhadra (SBC= SB Chart) Improvements:** SarvatoBhadra has been extended. Color options has been added for highlighting 'The Cross', nakshatra, letters and zodiac table cells. Also you may display planets as glyphs or letters, make them color and bold, etc. SarvatoBhadra preferences may be change in KP/SBhadra tab. Note, that now SBC support two date and two charts: a natal, that come from Sirius chart list and transit that is defined and stored in KWS. So, when you select a name from entries list, you select a natal data.

**60. Krishnamurti Paddhati Improvements:** Separate dasa year length now can be specified for KP independent of the main dasa listing. Multicolor dasas: each dasa level may have a separate background color that make the table more easy readable. The colors can be customized. Trans-Saturnians: Check

the Show Uranus-Pluto box in KP settings to display Uranus-Pluto in the chart. Pre-birth periods: Those may be displayed or hidden depending on your setting.

**61. Eclipses:** Eclipse list can be automatically scrolled down to the current year. Last Eclipse selected index stored and restored, so if in previous session you have selected, let's say, Jan 26, 2009, the next time the program starts this item is selected.

**62. Planet Text Ephemeris:** Create an Hourly, Daily, and Monthly Ephemeris. The Hourly ephemeris is awesome and unique.

**63. Extended calculation range:** SCalculations can be extended from the default of -4700 to +4700 to a range of -12998 to 16799. This can be helpful for researchers in archeo-astronomy tasks.

**64. Lunar Ingresses entered into the main Sirius program can now be accessed in Kepler Workshop.**

**65. Added 8 new ayanamsas added to KWS:** Suryasiddhanta, Aryabhata, SS Revati, SS Citra, True Citra, and True Revati.

**66. Planet Monitor:** Ayanamsha can now be changed to the Ayanamsha that comes with chart, Ayanamsha used in Sirius, or Ayanamsha used in KWS

**67. Planet Text Listing:** Minor asteroids can now be added. Planets and aspects can be color coded as well. Colors are preserved in exported document.

**68. Save to PDF in Kepler Workshop feature added.**

**69. Star Catalogue:** Display latitude and declination with "N" and "S" instead of positive and negative number. Exported CSV data now has a title.

**70. Vimsottari Dasa (listing):** Improved formatting: 2 digits age and full pre-birth periods. Previously was 1 digit and partial pre-birth dasa

**71. Sudasa Subperiods Option:** Equal subperiods division added

**72. Graphic Ephemeris:** Allow horizontal grid lines that are not even number of degrees.

## CHIRON & ASTEROIDS GEM REPORT

by Donna Henson

Many astrologers use Chiron but are still not sure of exactly how to interpret the zodiac sign, house placement, and aspects to Chiron. This report by Donna Henson provides these interpretations.

Donna has been using Chiron in her chart interpretations for decades and she has explored the finer nuances of the meaning of Chiron in the birth chart. If you are interested in Chiron, you may find this report revealing. She also added the four major asteroids interpretations along with the nodes.

- *Click on this link to view sample of this report:*

<http://www.astrosoftware.com/ChironAsterGem.pdf>

- **The Chiron and Asteroids Gem Report is \$150, with a new release promo of \$125 until September 30, 2018.**

Order a free sample report for you or your family member. Please send your birth data to [kepler@astrosoftware.com](mailto:kepler@astrosoftware.com) (do not call please).

Send the following information:

Name:  
Birth Date (MM/DD/YYYY):  
Birth Time (AM or PM):  
Birth Place:

We will send your sample on a first come first served basis. This offer is good until July 30, 2018.

Donna  
Henson

Donna is a professional astrologer, lecturer, counselor, and author who has worked with astrology since the age of ten. She has many years experience teaching astrology at Tarrant County College as well as teaching astrology classes in. Donna is the author of the Vertex Report that appears on the screen in the Kepler and Sirius programs when you click on Vertex. She also wrote a full version of the Vertex Report that is add on to the Kepler and Sirius programs.

## NEW FEATURES IN BINDU

Included Free if you are a registered user of Bindu by automatic update

**Rotate Panel:** In KP Astrology, you need to rotate the chart based on the given number from 1 to 249. In Classic Prasna, the querant being asked for a number of 1 to 108 which are the Navamsa Padas. Very often the KP Astrologer rotates the chart to a certain house or planet to be the first house. This panel does all of them with a single click!

**Heliocentric Position:** Although interpreting heliocentric planetary position is not a part of traditional astrology, some astrologers including people who are working on Market Forecasting use this position.

**Planetary Hours:** Every day from Sunrise to Sunset is divided into 12 parts each ruled by a planet commencing from Lord of the day. Planetary hours can be used in birth analysis as well as electing auspicious time.

**Lunar Points:** Rahu and Ketu are, of course, two important points. Two other important points are the apogee of the Moon (known as Black Moon Lilith) and the perigee of the Moon. According to Brazilian astrologer Vanessa Guazelli Paim, and other astrologers both the True and Mean Black Moon Lilith points can be interpreted to provide important information. This new feature allows you to see these two additional points in what Vanessa and other astrologers analyze as a kind of Lunar web.

**Fixed Star Catalog:** Fixed stars are an important area of all schools of astrology. When you select the "Bright Fixed Stars" from the Combo box above the Dasas, a list of some important fixed stars appears. By clicking on "Fixed Stars Catalog" the Catalog of Fixed stars shows up. You can filter the list by Constellation, Sign, Nakshatras, Magnitude or Names.

# COSMIC PATTERNS SOFTWARE

Superb Astrology Software

## Did you know . . .

Did you know that astrologers do not agree about how secondary progressed houses should be calculated?

We agree that the planets should be calculated using the formula that one day after birth has an impact that stretches over a year of life, but various modifications of this formula have been introduced for the calculation of secondary progressed houses. Sirius 3 introduces another variation of the formula for calculating secondary progressed houses and it is called Fractal Progressed Houses.

Fractal Time Progressed Houses and the Fractal Primary Progressed chart introduce a simple, clear and elegant way to solve a riddle that astrologers have been wrestling with for over a thousand years: how to properly calculate primary directions, while also providing a way to calculate secondary progressed houses in a logical way.

The Fractal Progressed Houses are based on an elegant concept of applying the day = a year formula a second time. David Cochrane gave a lecture about this at the recent UAC Conference in Chicago and within the next few months he will make a tutorial youtube video about it.

Did you know that Vibrational Astrology is becoming more popular, and there will be the first Annual Vibrational Astrology Conference?

## Vibrational Astrology Conference

**WHEN: APRIL 5 - 7, 2019**

**VENUE: Gainesville, Florida, USA  
Fairfield Inn Marriott**

**FEE: \$225** (includes Saturday night banquet dinner for first 150 attendees)

**This conference opens the door to a new world of Astrology. Whether you are new to VA or a practicing Vibrational Astrologer, be prepared to a journey of the future. Come join us!**

- ***The Vibrational Astrology Conference is the Ultimate Community Resource for Vibrational Astrology!***

**<http://www.astrosoftware.com/Conference/VA2019.html>**

**MINI CONSULTATIONS BY CERTIFIED VA ASTROLOGERS  
(Avalon Graduates)**

During the 45-minute morning and afternoon and afternoon breaks you can schedule a 15-minute mini-consultation with a graduate of the 2 1/2 year program in VA at the Avalon School of Astrology. Fee is \$15 per session. Longer consultations at other times can also be scheduled.

**Conference Flyer:**
