

SAROS CYCLES FROM SIRIUS V2

The 22 previous eclipses in the
Saros Cycle of the
“Great American Eclipse”
on 21 August 2017.

Every 18 years and 11 days
an eclipse occurs.

This very regular cycle is
known as the Saros Cycle.

SAROS CYCLES

The total solar eclipse on 21 August 2017 is the 22nd eclipse in the cycle. Given below are the 22 eclipse charts for this eclipse. Some astrologers believe that the first eclipse in the series of eclipses in a Saros Cycle is particularly important in setting a tone for the eclipses. Also, some astrologers look at the preceding few eclipses in the Saros Cycle to understand the energies that are building up to the current eclipse.

These eclipse charts were created in the Sirius 2.0 software. A recently added feature of displaying the Saros Cycle number and which eclipse it is in the sequence and a feature to produce any number of eclipses in the Saros Cycle make it easy to produce these chart wheels.

We also plan to make a youtube video on how to select this series of charts for this eclipse or for any other eclipse.

Solar Eclipse (astrological) Saros Cycle 145 # 1

Solar Eclipse Jan 2 1639

January 4, 1639

12:16:57 AM

Local Mean Time

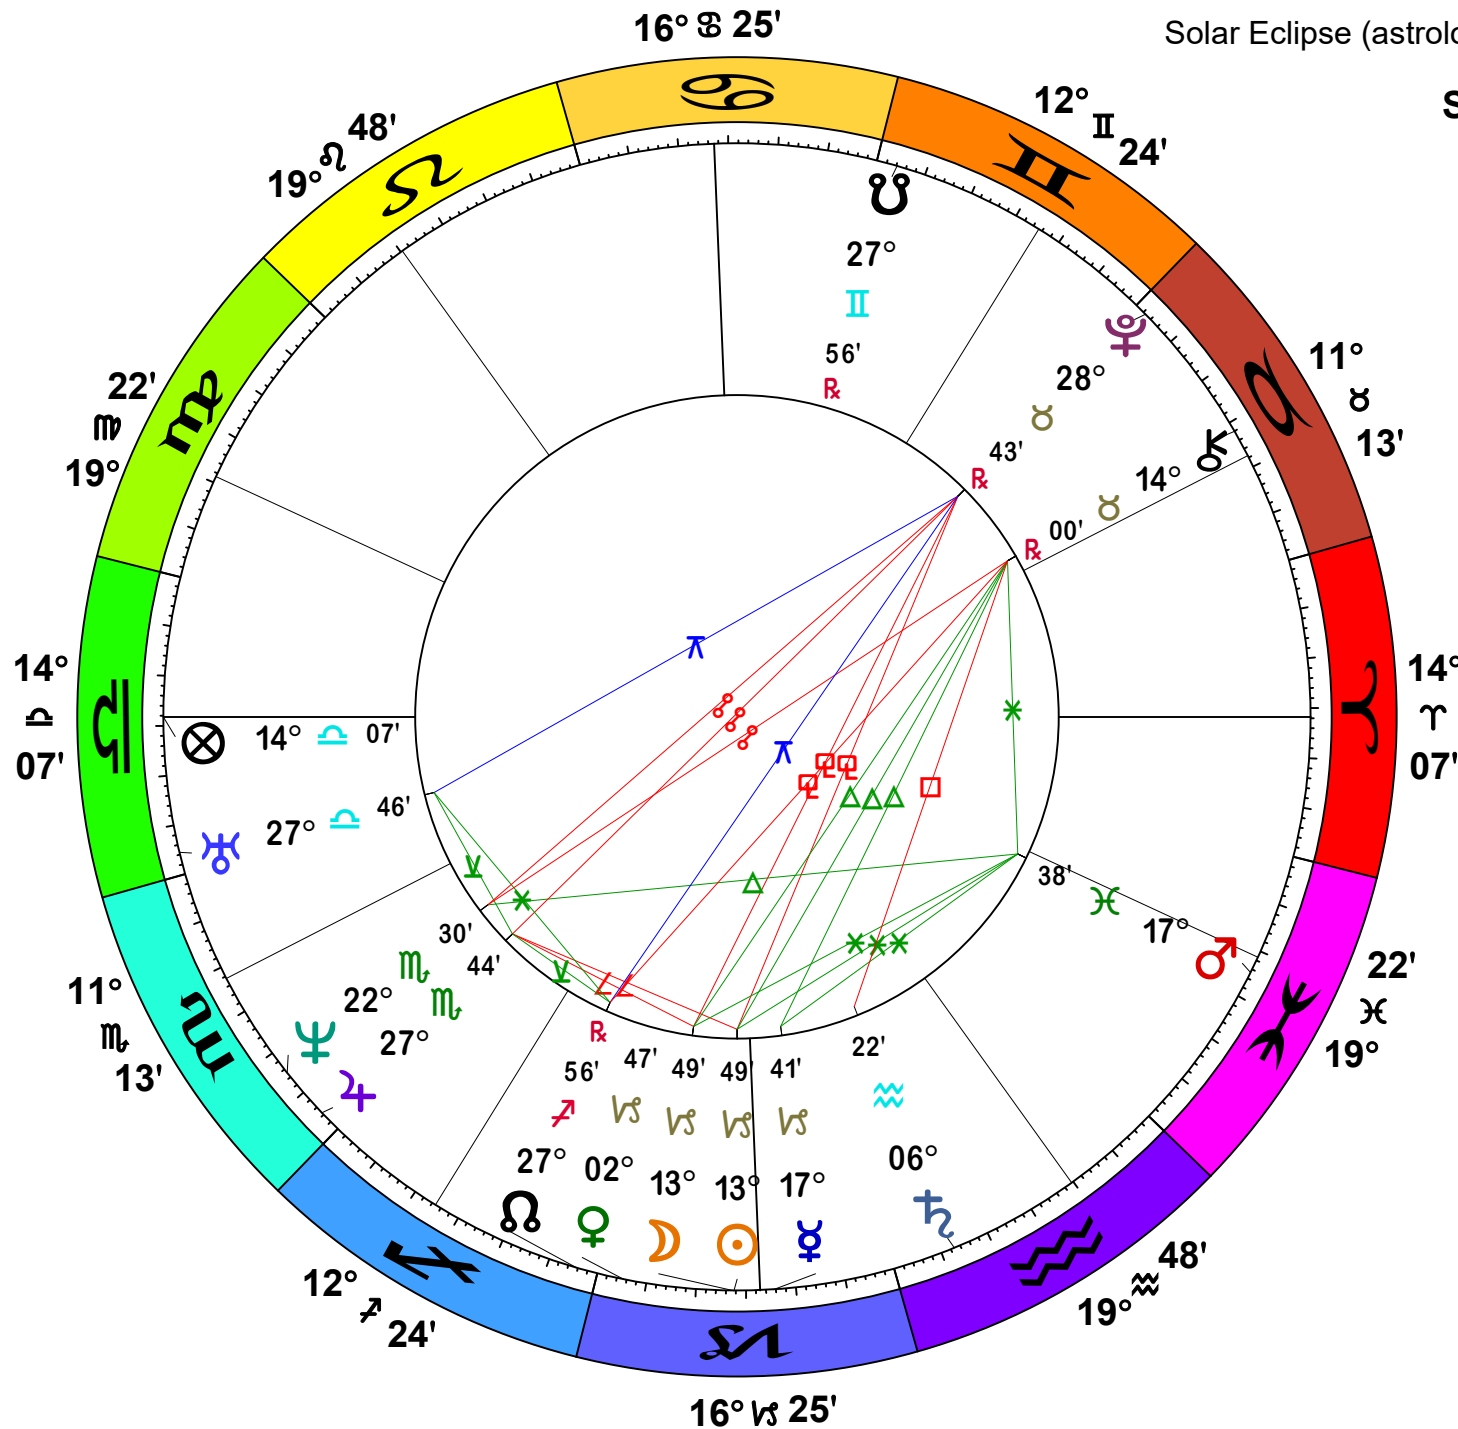

New York, New York
